

**LEWIS<sup>®</sup>**  
**BINS+**

PRODUCT CATALOG 2019-2020

LEWISBins+® combines proven products, manufacturing expertise and application insight to help companies add efficiency to their operation. LEWISBins+ is a part of ORBIS Corporation, a wholly owned subsidiary of Menasha Corporation. Founded in 1849, we have been pioneers in the material handling industry; introducing the first reusable plastic container in North America (under the LEWISystems brand). Our aggressive support and strong values combine to provide our customers with a great experience.

## REPRESENTED BY INDUSTRY LEADERS

LEWISBins+ collaborates with leading material handling dealers and distributors across North America. With tremendous industry knowledge and application expertise, these representatives are dedicated to finding the best material handling solution for their customers. LEWISBins+ distributors are supported by our experienced and committed customer service team.

## PROVEN PRODUCT SOLUTIONS

With more than 170 years of manufacturing experience, we offer a variety of containers, totes, bins and metal systems for work-in-process, storage and distribution applications.

- Part Bins
- Divider Boxes
- Stack-N-Nest Containers (Polylewton® brand)
- Distribution Containers (FliPak® brand)
- Shelf Bins
- Fiberglass Containers (Plexton® brand)
- Metal Storage Systems

## LEWISBINS+ ADVANTAGES

- Broad product line
- Manufacturing excellence
- Strong loyalties
- Rapid “ship-from-stock” program
- Industry and application knowledge
- Packaging heritage and integrity
- Technology, material and design expertise

## MARKETING SUPPORT

Need images or website copy? Call our LEWISBins+ marketing team. We work hard to make your life simple.

## LEVERAGING TECHNOLOGY TO ADD EFFICIENCY

We now offer valued dealers and distributors our online resource for important order information at <https://access.lewisbins.com/>. A click of the button will show order status and shipment detail, right down to the PRO number. If going online is an issue, no problem! We can automatically email the information—minutes after it leaves our plant. The redesigned LEWISBins+ website, [www.lewisbins.com](http://www.lewisbins.com), offers the ability to search for products, review dimensions, register to become a distributor and more—all with the click of a button!

**STANDARD MATERIALS AND SHIP-FROM-STOCK PROGRAM**

**Polyethylene Plastic (PE)** is well suited for typical manufacturing environments. Depending on the individual HDPE selected, products manufactured in this material can remain stable at temperatures in the typical working range of -50°F to 230°F. For short term exposures, like washing, temperatures should not exceed 248°F. While PE is resistant to many chemicals, an optional Environmental Stress Crack Resistant (ESCR) polyethylene is available for needed applications.

**Polystyrene Plastic (PS)** is known for its rigidity and stiffness. Comparatively, PS is much stiffer than polyethylene and polypropylene, with lower mold shrinkage.

**Polypropylene Plastic (PP)** material is similar to polyethylene and offers excellent chemical resistance and remains stable in the typical working range of 10°F to 240°F. This material's advantages over PE include greater stiffness and elevated use temperature. Short term exposures should not exceed 275°F. Translucent or opaque options are also available in some product families.

**Fiberglass-Reinforced Polyester** products produced with this compression-molded, high strength polyester provide dimensional stability, high weight capacity and the ability to withstand extreme temperatures of -60°F to 250°F.

**ESD-Safe Materials** protect your products from the damaging effects of static electricity. Products that are stocked in ESD-Safe material can be found on pages 31-38. Additional LEWISBins+ products are available on a made-to-order basis. Contact your Sales Representative for more information.

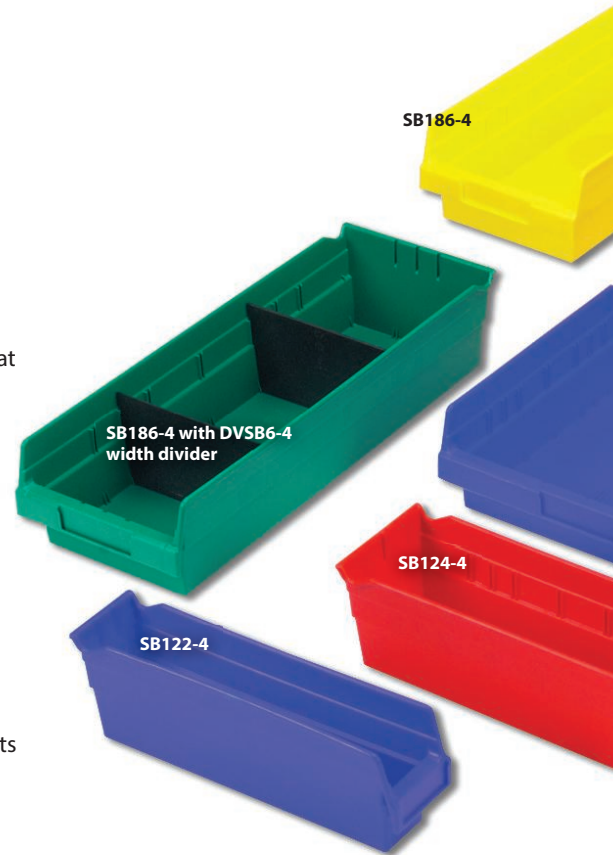

**Ship-From-Stock (SFS) Program** Most products in this catalog are part of the LEWISBins+ Ship-from-Stock Program and will ship promptly. Selected products, indicated with an asterisk (\*), are manufactured on a made-to-order basis and are subject to minimum order quantities and set-up charges.

# SHELF BINS

Add efficiency to assembly, work-in-process and picking applications in a wide range of industries. LEWISBins+ Shelf Bin series consists of 4" and 6" tall plastic shelf bins, designed for 12", 18" and 24" depth shelving units. These injection molded bins are designed to replace limited-use corrugated boxes for long term cost savings. LEWISBins+ Shelf Bins are stocked in red, blue, yellow and green. Fully nestable when empty for space savings and fully recyclable at the end of their service life.

## LEWISBINS+ Shelf Bins

- Rolled rim design and molded-in rib structure ensures bin integrity  
Nestable when empty for storage space savings
- Large undercut label slot for either cardholders or adhesive labels
- Increased material storage and capacity, raised hopper front and tall dividers allow up to 35% more material storage
- Optional length divider locks into bin creating two or three additional storage compartments
- Manufactured in polypropylene

# SHELF BIN DIVIDERS

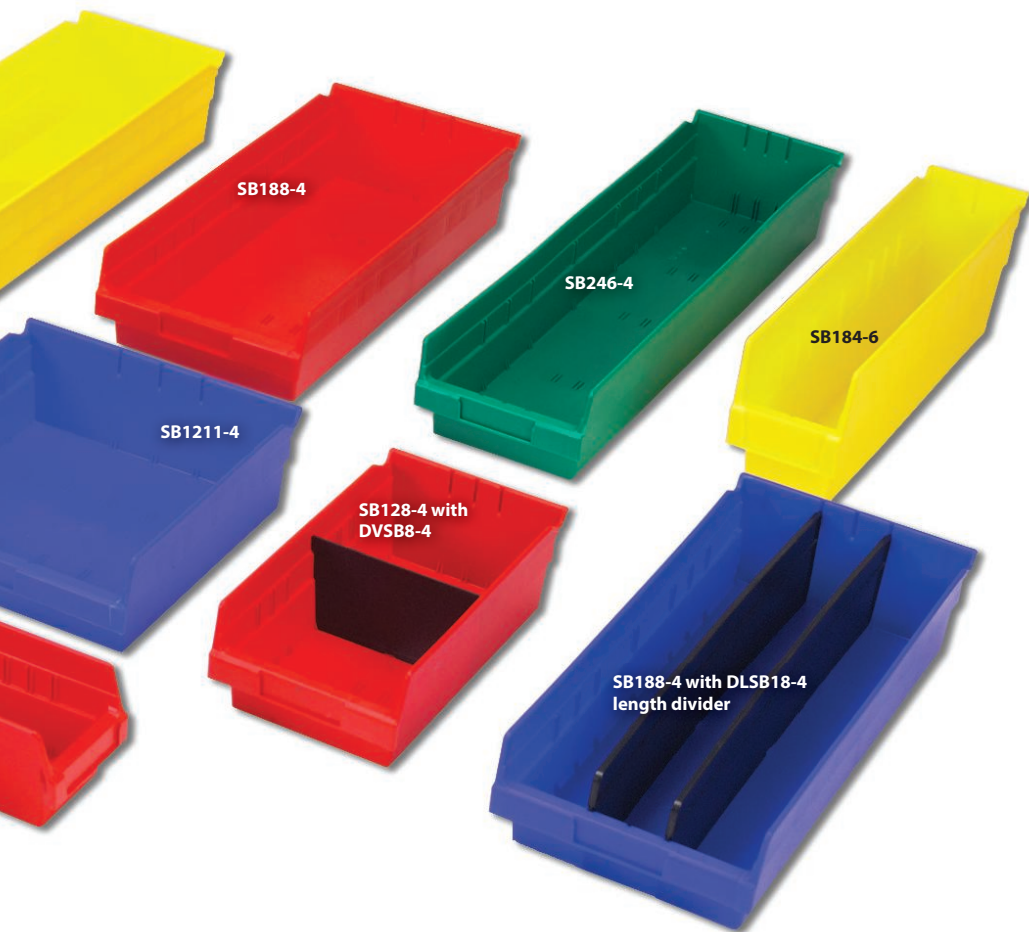

Drive hidden costs out of a variety of industries operations at an affordable cost. LEWISBins+ Shelf Bin Dividers are engineered to provide versatility for your shelf bins. Full length divider turns shelf bin into two or three smaller bins at a fraction of the cost. Shelf bin width dividers, available in black and orange (kanban), increase inventory management efficiency.

## LEWISBins+ Kanban Divider System

Utilize LEWISBins+ Kanban Divider System within your operation in an effort to drive efficiency through Lean and Just-In-Time inventory control principles. The Kanban Divider System was developed to be a low-cost alternative to high-class inventory control systems — every business deserves an opportunity to drive inefficiency and hidden costs out of their operation at an affordable price.

1. Stock Shelf Bin to desired level, using optional kanban width divider to designate the "reserve inventory"
2. Pick from Shelf Bin until you reach the kanban divider
3. Reposition kanban divider to the front of the Shelf Bin to signal inventory levels are low and need replenishment
4. Replenish Shelf Bin and repeat process to enhance picking and inventory control
5. Visit <http://youtu.be/Q5aLvPsFCzk> for more information

## LEWISBINS+ Shelf Bin Dividers

- Engineered to provide versatility for your Shelf Bins and width dividers are available in black and orange (kanban)
- “Double winged” design makes width dividers taller, creating more valuable storage space than comparable bins
- Seven width divider positions and up to three length divider positions offer versatility to bin configuration
- Full length divider turns shelf bin into two or three smaller bins at a fraction of the cost
- Manufactured in polystyrene

## LEWISBINS+ Part Bins are fully compatible with competitive part bins!

## PART BINS

- Hopper front with curved design enables convenient part retrieval
- Wide stacking ridge enables stacking to save space
- Optional length dividers are available to keep contents organized
- Dividers also increase versatility by providing an optimized compartment size
- Bins hang securely on rails, louvered panels, storage cabinets, bin carts and wall cabinets (See pg. 19-28 for Metal Storage Systems)
- Large front label slot allows bar code or ID card
- All colors are FDA approved except red and stone
- Manufactured in polypropylene

\* For lifting safety, Occupational Safety and Health Administration (OSHA) recommends manual loads not exceed 40 lbs.

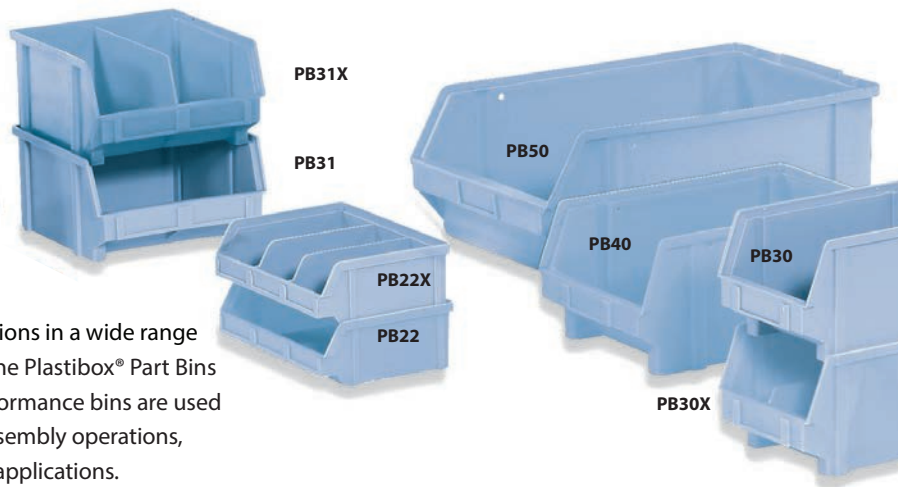

\*\* All Dividers are stocked in Black and packaged in quantities of six (6).

All specifications are approximate and subject to change without notice.

# PLASTIC BOX® PART BINS

Add efficiency to assembly, work-in-process and picking applications in a wide range of industries. Choose from 14 LEWISBins+ stackable polypropylene Plastibox® Part Bins designed to function individually or as a system. These high-performance bins are used for secure storage and organization of small parts in industrial assembly operations, healthcare, stockroom, warehouse and hardware merchandising applications.

- 8 sizes available (6 with optional molded-in dividers)
- Label insert area for easy identification
- Bins hang on most louvered panels or rails\*\* (See pg. 19-28 for Metal Storage Systems)
- Smooth inside gravity flow interior optimizes parts accessibility
- "X" designates molded-in dividers, to eliminate part migration
- These products are also stocked in ESD-safe material (See pg. 33)
- Manufactured in polypropylene

# UNIT DOSE BINS

Add efficiency to picking applications in a wide range of industries with Unit Dose Bins. Unit Dose Bins are ideal for efficient dispensing and inventory control of strips, orals and injectables. Bins fit on 36" wide shelves, 12" shelf depths.

- Molded-in cardholders for convenient identification of products
- Manufactured in high-impact polystyrene.

# HEAVY DUTY HOPPER BINS

Add efficiency to heavy-duty picking, assembly and sorting applications with Heavy Duty Hoppers. Get high density storage and quick access to your product with Stack and Nest Hoppers. Plexton® Stack-N-Nest hopper-front containers provide the ability to pick and visually inspect the content, yet nest when empty to save valuable space.

## HEAVY DUTY PLEXTON® HOPPER BINS

- Large front label area accommodates adhesive labels
- Nest within their own dimensions and provide positive-lock stacking
- Works well with Plexton Container Racks (See pg. 28)
- Designed to work with 18" and 24" shelving (See pg. 19)
- Manufactured in fiberglass reinforced polyester

## STACK AND NEST HOPPER BINS

- Stacks securely when full and nests when empty
- NPL215 has swing arm handle for easy handling
- Manufactured in high-density polyethylene

## HEAVY DUTY SHELF BINS

- Large hopper front for easy picking
- Large label area for content identification
- Adjustable wire bail on NBS2415-12 allows bin to stack when full and nest when empty
- NO2415-12 (without bail) is a nest-only container and is ideal for picking applications
- Save on storage space by nesting empty NBS2415-12 and NO2415-12 containers
- Manufactured in high-density polyethylene

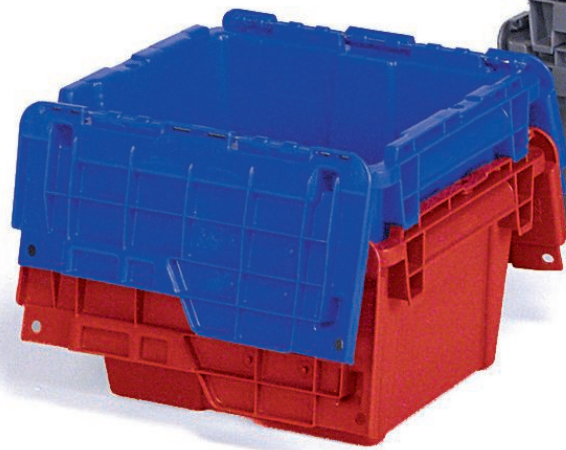

All specifications are approximate and subject to change without notice.

# DISTRIBUTION CONTAINERS

Add distribution efficiency, reduce product damage and maximize storage space. The FliPak® family offers multiple container sizes with attached hinged covers that prevent expensive loss of product. These containers stack when closed or nest when open to provide the most efficient use of available space on the manufacturing floor, in the warehouse, inside a truck trailer or in the back room of a retail outlet.

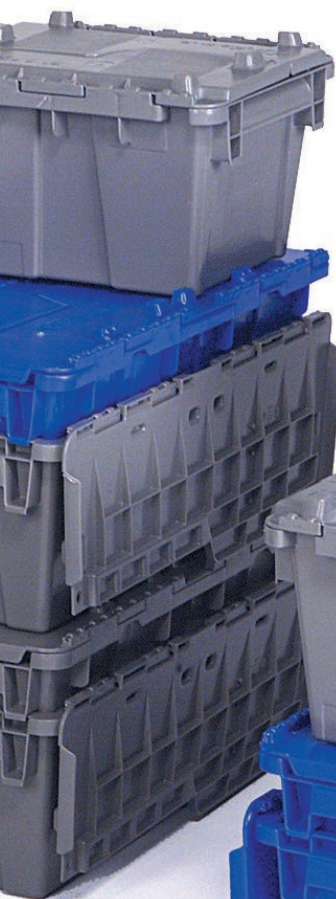

## FLIPAK® CONTAINERS

- 1/4" or 3/8" diameter reinforced security holes are compatible with a variety of security tote closures
- Quick-release label area on attached hinged cover and ends for easy reading and quick label exchange
- Seven FliPak sizes available in Clear: FP03, FP06, FP075, FP143, FP182, FP243 and FP261
- Visible area above nest stops for easy reading of optional sequential number when nested or stacked
- Pebble-grain bottom surface provides excellent conveyor traction
- Heavily reinforced hinge elements reduce breakage and cracking
- Cover recessed within the perimeter of container to protect against cover breakage while conveyed or shipped
- Select containers are available with optional detached covers
- Colors manufactured in high density polyethylene. Clear manufactured in polypropylene

*Distribution Containers meet the diverse needs of many types of picking and storage applications in modern distribution systems.*

# POLYLEWTON® STACKABLE AND NESTABLE CONTAINERS

Containers nest when empty and stack when full for space savings and efficiency. Polylewton® containers are ideally designed for use in general manufacturing, food processing and distribution applications.

## POLYLEWTON® STACKABLE AND NESTABLE CONTAINERS

- Stack when full (with or without covers) and nest when empty at an alternating 180° position
- Resistant to rust, corrosion and temperatures ranging from 0°F to 120°F
- Easily cleanable and ideal for handling unpackaged product. No sharp edges, burrs or splinters
- Maximum load capacity of 70 lbs. per tote, bottom container supports 300 lbs. stacked
- Textured bottom on selected containers ensures compatibility with conveying equipment
- Compatible with many racking and shelving styles
- A variety of Hole Patterns are available on solid containers for increased ventilation and drainage
- Durable matching covers are available for selected containers to protect product from moisture, impact and contaminants.
- Resistant to damaging effects of oil, most chemicals, solvents, water and steam
- Manufactured in high-density polyethylene

## IDENTIFICATION OPTIONS

- Many Polylewton containers and covers are manufactured with Security Holes to accommodate security ties and hang tags
- Available options include Cardholders, Hot Stamps and Molded-In Identification (See pg. 39)

## VENTILATED STACK-N-NEST CONTAINERS

- 3 footprints available, including 20" x 13", 20" x 14" and 24" x 16"
- Stacks when full and nests when empty
- Ventilated design for easier cleaning, accurate temperature control and minimized cooling times
- Manufactured in high density polyethylene

# DIVIDER BOXES

Add flexibility with dividable containers. Slide-in dividers allow instant container configuration. Multi-purpose stack-only LEWISBins+ Divider Box Containers can be divided into compartments on 1.25" centers with easy-to-add dividers. These dividable containers are ideal for use in commercial, industrial, electronics and healthcare markets for storage, assembly, fabrication and distribution applications. Divider Boxes are also stocked in ESD-Safe materials. (See pg. 35-36).

## DIVIDER BOXES

- Strong stacking ridge and innovative ribbed walls ensure high performance
- Choose from industry standard container sizes
- Multiple identification options for added flexibility and efficiency
- Load capacity of 40 lbs. per container
- Choose from multiple cover styles for product protection
- Compatible with many kinds of racking, shelving and material handling equipment
- Two snaps included on all containers for use with cardholders (see pg. 14)
- Manufactured in high-density polyethylene

# DIVIDER BOX DIVIDERS

Subdivide LEWISBins+ Divider Boxes to increase part protection and prevent part migration. Vertical Dividers are available to maximize efficiency and flexibility. For easy insertion of dividers, NDC containers feature molded-in "no guess" textured divider grid and numbered divider slots. Multiple-height polyethylene dividers are available for all models, excluding DC1025. Vertical Dividers (below) are available in a variety of heights and are contoured for easy insertion.

# DIVIDER BOX ACCESSORIES

Add efficiency with dollies, cardholders, security tags and identification options.

Add mobility and ease of handling with the Divider Box Dolly, compatible with the DC3000 series containers. Add efficiency with a wide range of Divider Box Accessories, including cardholders, security ties, hot stamping and molded-in logo capabilities. (See pg. 39).

## ACCESSORIES

- Snap-On and Adhesive Cardholders are available in a variety of sizes and styles, and materials (Including ESD-Safe)
- Standard NDC model containers have holes to accommodate Security Ties and Hang Tags
- Containers may be customized with Hot Stamps or Molded-In Identification

## DOLLY

- Heavy-duty dolly has a 840 lb. weight capacity
- Dolly equipped with two swivel and two fixed 3" casters
- This product is also stocked in ESD-Safe material (See pg. 35-36)

# PLEXTON® CONTAINERS

Add heavy duty performance to a variety of extreme applications. Plexton containers, hoppers and trays can be manufactured in materials for fire retardance and food grade. Trays are available in ESD-safe material. These fiberglass-reinforced containers feature Stack-N-Nest® design, consistent tare weight, smooth outside surface and radius angles for easy and safe handling. All Plexton containers, hoppers and trays can be manufactured in materials for flame retardance, food grade, or ESD protection. Plexton containers are your ideal solution for heavy-duty storage, work-in-progress and distribution applications.

HR1615 rack with  
SH1811-7

Casters can be added to underside of cover to create a custom-fit dolly (DOC) or directly to the container for greater mobility (TSN).

## PLEXTON® CHARACTERISTICS:

- High impact, compressive, flexural and flexible strength
- Excellent chemical resistance
- High volume and surface resistivity
- High dielectric strength
- High arc and arc-track resistance
- Excellent microwave characteristics

## PLEXTON® CONTAINERS WITHSTAND:

- Extreme cold temperatures to -60° F
- Extreme heat up to 250° F (continuous) and 300° F (intermittent)
- Fully autoclavable
- Extreme weight up to 500 lbs. per container, bottom container in stack supports up to 3,000 lbs
- Resistant to most oils, moisture, chemicals and solvents, not affected by radiation
- Available with or without a wire-reinforced rim

# PLEXTON® TRAYS & HOPPERS

Boost picking and assembly efficiency with heavy-duty hoppers and trays. Get high density storage and quick access to your product with Plexton Hoppers & Trays.

These containers give you all of the strength and tough characteristics of our Plexton Stack-N-Nest containers with the ability to pick and visually inspect the contents.

Assembly Trays are ideal for many applications, such as industrial, confection, electronic, distribution and work-in-process.

# NEST-ONLY & STACK-ONLY CONTAINERS

Add efficiency to assembly, work-in-process and picking applications in a wide range of industries. Plexton® Stack-Only and Nest-Only Containers are ideal for storing, moving and shipping small parts, as well as for autoclaves, healthcare and x-ray/security applications. Thin-wall design and construction gives maximum strength while remaining lightweight.

## NEST-ONLY & STACK ONLY CONTAINERS

- Accommodate extreme temperature ranges, -60°F to 250°F or 300°F intermittently
- High weight capacity
- Optional covers can also be used as trays (See pg. 17)
- Nest-only containers nest efficiently when empty and stack with covers
- Manufactured in fiberglass-reinforced polyester

# METAL SHELVING UNITS

Add instant organization to your workspace with adjustable Shelf Systems that hold all types of bins. LEWISBins+ Shelf Systems improve organization & efficiency. These highly versatile, fully adjustable Shelf Systems offer a variety of shelf configurations, with 12", 18" and 24" shelf depths to accommodate a wide variety of bin sizes and styles. (Bins sold separately).

## 6 AND 7-SHELF UNITS

- Accommodates Heavy-Duty Shelf Bins (pg.6) and larger Part Bins (pg.3-4) to provide high density storage for heavy industrial needs
- Shelf depths of 18" and 24"
- Holds up to 24 bins

**M2436-6**

\*\* Excluding top shelf.

# WALL MOUNTED SYSTEMS

Optimize workrooms and cells with easy-to-install Wall Mounted Systems that securely hold part bins. Add workstation efficiency with LEWISBins+ Wall Mounted Louvered Panel and Steel Rail Systems. Both can be securely fastened to workstation or shop walls. Bins can be ordered separately.

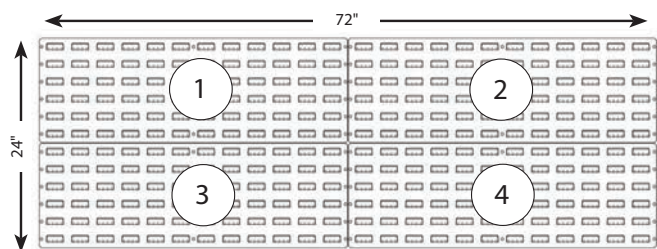

18" x 36" LP1836-CST shown with PB74-3 & PB1011-5

12" x 36" LP1236-CST shown with PB54-3 & PB74-3

RA248-AST, shown with PB54-3 and PB74-3.

Four (4) LP1236-CST Panels

## WALL MOUNTED SYSTEMS

- Louvered Panels and Steel Rails mount securely to walls, single panels can be combined to create wall-mounted systems for any workspace
- Sturdy 16-gauge steel
- Grey baked enamel finish stands up to heavy-duty industrial uses
- Wall Mounted Louvered Panels hold up to 160 lbs. and steel Rails hold up to 225 lbs
- These products are also stocked in ESD-Safe material (See pg. 37)

LP1818-CST shown with PB74-3

\* Weight, excluding bins. \*\* Load Capacity, including bin weights.

\*\*\* Quantity indicated is for the total of like-sized bins to fill an entire system. Not for mixed bin configurations.

# RAIL FLOOR STANDS

Save space on the shop floor with Rail Floor Stands. Part Bins hang securely on rugged rails. Organize your workstation floor with LEWISBins+ Rail Floor Stands. Stands are available in single or double sided styles. Systems with bins are available or bins can be ordered separately. Single sided Steel Rail Floor Stands hold up to 600 lbs. and double sided Floor Stands hold up to 1,200 lbs. Optional Mobile Kit adds instant mobility.

## RAIL FLOOR STANDS

- Single or double-sided stands meet a wide variety of work-in-process and storage needs
- For greater versatility and convenience, add a mobile kit to the double-sided floor stands
- Finished in grey baked enamel
- Manufactured from durable 16-gauge steel
- Products are also stocked in ESD-Safe material (See pg. 38 for details)

# METAL STORAGE CABINETS

Add security and organization to your workspace with Metal Storage Cabinets, available in many styles. LEWISBins+ rugged, welded-steel all-purpose Storage Cabinets keep valuable parts secure and organized. They are available with multiple sizes and multiple colors of LEWISBins, or with a combination of shelves and LEWISBins. All cabinets accommodate a variety of LEWISBins Part Bins. (See chart for details).

## METAL STORAGE AND COMBINATION CABINETS

- 12 gauge construction
- All welded construction with wrap around body design
- Grey baked enamel finish stands up to heavy-duty industrial environments
- 3-point locking device can be locked with a standard padlock
- Sturdy, 6" tall 7-gauge legs
- Bins can be removed for easier part selection and re-stocking.
- Storage Cabinets available with multiple sized bins for organizing large and small parts with ease.
- Combination cabinets come with (4) adjustable shelves made from 14-gauge steel
- Anchoring to floor to ensure stability is recommended

### Metal Storage, Combination and Clearview Cabinets

● YPB - Yellow Bins

## HEAVY-DUTY DRAWER CABINETS

- Heavy duty, 12 gauge construction
- All welded construction with wrap around body design
- One adjustable 14-gauge shelf
- Four drawers with 400# weight capacity.
- Grey baked enamel finish stands up to heavy-duty industrial environments
- 3-point locking device can be locked with a standard padlock
- Sturdy, 6" tall 7-gauge legs
- Bins can be removed for easier part
- Anchoring to floor to ensure stability is recommended

## SLIM LINE CABINETS

- Cabinet is only 10" deep for ease of storage placement
- Heavy duty, 12 gauge construction
- All welded construction with wrap around body design
- Grey baked enamel finish stands up to heavy-duty industrial environments
- 3-point locking device can be locked with a standard padlock
- Sturdy, 6" tall 7-gauge legs
- Bins can be removed for easier part selection and re-stocking.

**All specifications are approximate and subject to change without notice.**

# BIN CARTS AND CABINETS

LEWISBins+ Bin Carts and cabinets designed for rugged factory use, yet attractive for use in an office. Transport equipment and small parts from one workstation to another. LEWISBins+ Wall-Mounted Bin Cabinets, available in 3 sizes, easily mount to work-station walls. The efficient cabinet depth and heights optimize wall space. All are lockable for secure storage of high-value items.

WCAB2630

## BIN CARTS

- Secure contents in lockable drawers of MC3624-12
- 5" polyurethane casters (2 swivel & 2 rigid)
- 16-gauge construction top tray, 2 1/2" deep
- 1000 lb. weight capacity
- MCPB models offer double sided design for easy access in any work space and lipped tray to hold items in place during movement.
- The MC3624-12 offers four locked drawers and enclosed area for 12 bins

## BIN CABINET WITH SHELF (WCAB2630)

- 20-gauge, all-welded construction
- Fixed shelf with louvers on bottom half and under shelf cylinder lock w/ 2 keys

## BIN CABINET (WCAB4827)

- 18-gauge, all-welded construction
- 2-point locking rods, keyed handle with 2 keys

MC3624-12

WCAB4827

# METAL HOPPER RACKS

Maximize space utilization and provide easy access to containers and parts. Combine LEWISBins+ Metal Hopper Racks with a wide range of containers to add efficiency to workshops, assembly cells and storage areas. Each rack is two columns wide and add-on units are available to expand width. Double-depth racks allow part access from both sides.

# RECYCLING PRODUCTS

High quality bins and carts for office and plant recycling efficiency.

Do your part in preserving the environment! Choose from the LEWISBins+ brand of recycling products for home and office recycling applications. Curbside recycling containers are molded, one-piece designs that are lightweight and durable. Designed for easy handling and cleaning, all products are fully recyclable at end of service life.

## WHEELED CARTS

- 360° double rim, snap tight lid keeps pests out
- Ergonomic side handles for easy curb transportation
- Manufactured with recycled material
- Cornerless, smooth interior walls for ease of cleaning
- Two sizes available: 12 and 21 gallon

## STACK AND NEST RECYCLING CONTAINERS

- Swing arm handle (NPL 215) and full handles (NPL 252) for ease of carrying
- Stacks for source separation of recyclables and nests when empty
- Includes Mobius Recycling loop

## RECYCLING CONTAINERS

- Pocket handles for easy lifting
- Drain hole bottoms prevent liquid build-up (Excluding NPL 215)
- Covers available on select models

## ACCESSORIES

- Bin Dolly allows for easy curbside transportation

NPL 285 - 21 Gallon

NPL 280 A - 12 Gallon

**Recycling has never been easier with LEWISBins+ recycling products!**

# ESD-SAFE PRODUCTS

Organize work areas to efficiently store components, assemblies and circuit boards.

ESD-Safe Products are ideal for electronics, telecommunications and computers. LEWISBins+ ESD materials conform to ANSI/ESD S20.20\* 2007 requirements for ESD packaging. Contact your LEWISBins+ sales representative for more details on other dissipative materials that are available.

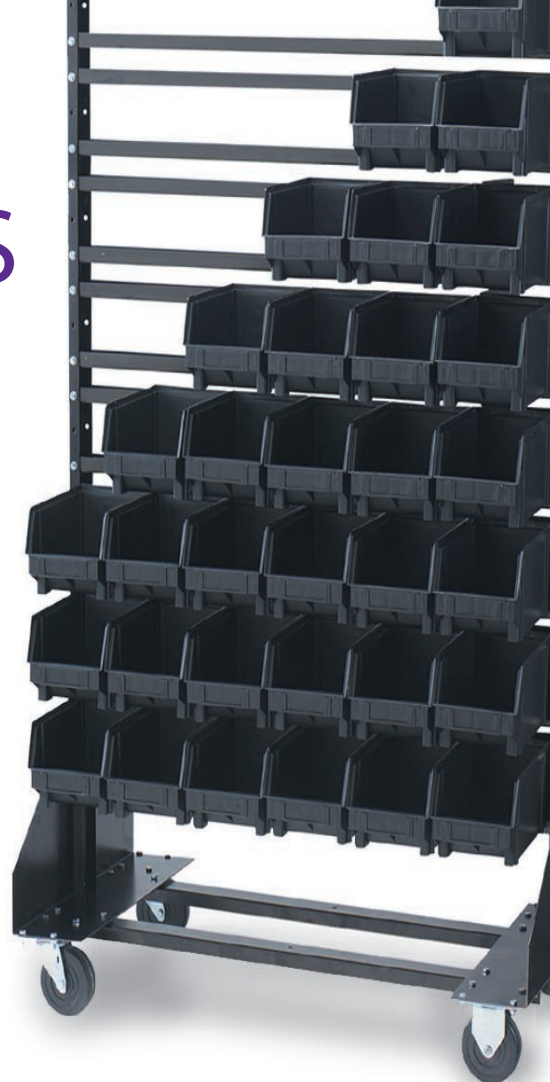

## ESD-SAFE PRODUCTS

- Materials conform to the static decay requirement of FTM-101B, Method 4046.1 dissipating a 5,000 volt charge to 0 when grounded in less than two seconds
- Standards require conductive materials surface resistance to be  $< 1.0 \times 10^4$  ohms and dissipative materials to be  $> 1.0 \times 10^4$  ohms to  $< 1.0 \times 10^{11}$  ohms when tested per EOS/ESD S11.11

### ESD-Safe Materials

Property	Test Method Units	Conductive Material	Dissipative Materials	
		XL	LS	SD SMC
Surface Resistivity	ASTM D257 (ohms/square)	$< 1.0 \times 10^5$	$\geq 1.0 \times 10^9$ $< 1.0 \times 10^{12}$	$\geq 1.0 \times 10^5$ $\leq 5.0 \times 10^9$
Surface Resistance	EOS/ESD S11.11 (ohms)	$< 1.0 \times 10^4$	$\geq 1.0 \times 10^8$ $< 1.0 \times 10^{11}$	$\geq 1.0 \times 10^4$ $\leq 5.0 \times 10^8$
Static Decay	FTM-101B Method 4046.1 (seconds)	$< 2$ seconds	$< 2$ seconds	$< 2$ seconds
Temperature Range	°F	40°F to 225°F	40°F to 225°F	-60°F to 250°F

Note: At upper end of temperature range intermittent use is recommended.

**CONDUCTIVE MATERIAL - XL MATERIAL** is a thermoplastic polypropylene material based upon carbon black that has a surface resistance of less than  $1.0 \times 10^4$  ohms or surface resistivity of  $< 1.0 \times 10^5$  ohms/square. XL material has a static decay rate from 5,000 volts to 0 of less than two seconds. This material has a useful temperature range of 40°F to 225°F, with intermittent use recommended at the higher end of the temperature range. The electrical properties of this material are permanent and unaffected by washing.

*Protect valuable contents from static electricity.*

DC3060-XL on ESD-Safe  
DDC3000-CON Dolly

**DISSIPATIVE MATERIAL - LS MATERIAL** is a polypropylene material that is on the upper end of the dissipative range. The material has a surface resistance greater than or equal to  $1.0 \times 10^8$  ohms, but less than  $1.0 \times 10^{11}$  ohms or surface resistivity greater than or equal to  $1.0 \times 10^9$  ohms/square, but less than  $1.0 \times 10^{12}$  ohms/square. LS material has a static decay rate from 5,000 volts to 0 of less than two seconds. This material has a useful temperature range of 40°F to 225°F, with intermittent use recommended at the higher end of the temperature range. Electrical properties are affected by humidity. This material is available on a made-to-order basis only.

**DISSIPATIVE MATERIAL - SD SMC MATERIAL** is a thermoset polyester based material that is on the lower end of the dissipative range. The material has a surface resistance greater than or equal to  $1.0 \times 10^4$ , but less than or equal to  $5.0 \times 10^8$  ohms/square and a surface resistivity greater than or equal to  $1.0 \times 10^5$  ohms/square, but less than or equal to  $5.0 \times 10^9$  ohms/square. This material has a useful temperature range of -60°F to 250°F, is autoclavable and does not melt at high temperatures making it ideal for handling hot parts. The electrical properties of this material are permanent and unaffected by washing.

# ESD-SAFE PART BINS AND TRAYS

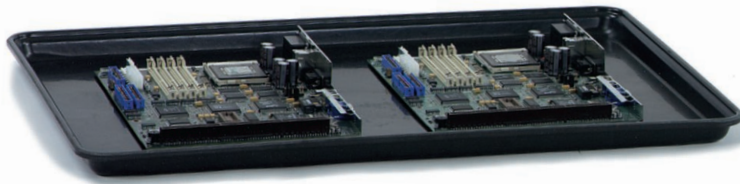

Protect parts from the damaging effects of static electricity. ESD-Safe Part Bins are permanently molded in conductive material for use in cleanrooms and workstations. Combine Part Bins with ESD-Safe Metal Storage Systems to meet your work-in-process requirements. See pg. 37-38 for more information on ESD-Safe Metal Storage Systems. Note: PB50 is not designed for use on hanging systems.

## ESD-SAFE PART BINS

- 8 sizes available
- Label insert area for easy identification
- Smooth gravity flow interior optimizes parts accessibility
- Bins hang on most louvered panels or rails
- Solid covers are available to further protect parts by creating a Faraday Cage

TR2618-1SD

TR1814-1SD

## ESD-SAFE TRAYS

- Resistant to abrasion and chemicals
- Easily cleans in steam or water with a temperature range of -60° to 250°F
- Trays are permanently dissipative
- Ideal for many industrial, electronic, distribution, storage and work-in-process applications

### ESD-Safe Assembly Trays

## ESD-SAFE SHELF BINS

- Designed to work with 12" and 18" shelving to enhance inventory control and part organization
- Bins nest when empty to save space
- Built-in hang lock allows bin to tilt out for full part accessibility. Hopper front optimizes part accessibility
- Large flat area for adhesive identification and bar code scanning (See pg. 39)
- Each bin can accommodate up to 3 dividers
- Optional conductive dividers slide in easily and lock securely to eliminate part migration

# ESD-SAFE DIVIDER BOXES

Add flexibility with dividable containers. Slide-in dividers allow instant container configuration. Multi-purpose stack-only LEWISBins+ ESD-Safe Divider Box Containers can be divided into compartments on 1.25" centers with easy-to-add dividers. These dividable containers are ideal for use in commercial, industrial, electronics and healthcare markets for storage, assembly, fabrication and distribution applications.

## ESD-SAFE DIVIDER BOXES

- Strong stacking ridge and innovative ribbed walls ensures high performance
- Compatible with many kinds of racking, shelving and material handling equipment
- Anti-static cardholders available for ESD-Safe identification (See pg. 39.)
- Load capacity of 40 lbs. per container
- Two optional ESD-Safe Divider Box Covers are available for added product protection

**Combine ESD-Safe Part Bins with Conductive Floor Stands to increase storage efficiency.**

## ESD-SAFE LOUVERED PANEL FLOOR STANDS

- Manufactured from 16-gauge steel
- Finished in a durable black permanently conductive coating.
- Two-sided racks easily convert to a mobile unit with the addition of the mobile kit. (MK4000-CON).
- Stationary racks can be fastened securely to the floor for additional stability.
- Proper grounding is recommended

# PRODUCTION OPTIONS & ACCESSORIES

A variety of options and accessories are available for LEWISBins+ products to increase efficiency and flexibility in your material handling system. These are not applicable for all products. Please contact your sales representative for details on availability, minimum order quantities, lead times and additional charges.

**Loose Letter Hot Stamp Identification** allows for 1" capital letters in a pre-defined area on the container.

**Sequential Numbering Hot Stamp Identification** is available with each character limited to a 1/2" height. Five characters per line may be utilized.

**Customized Hot Stamp** is available if the number of letters exceeds the available space with other identification options.

**Container Grommets** facilitate the use of security ties and various hang tags. A pre-determined area is available on certain products for the installation of the grommet.

**Security Ties** slip into factory installed security tie holes in the container and cover for fast, efficient locking of covers. The plastic tie is easily removed by cutting, with no damage to container or cover.

## PLEXTON IDENTIFICATION OPTIONS

**Screen Printing** allows for custom messages and logos. Original artwork must be supplied at the time of order. The requirements for the area and location for the screen printing area vary for each Plecton product.

**Snap-On Cardholders** are envelope style and available with one or two snaps. All have a clear window with solid back. ESD-Safe Cardholders (CH10LS, CH20LS, and CH30LS) are produced in clear anti-static pink material.

CH10 2-Snap

CH14 2-Snap

CH20 2-Snap

CH30 2-Snap

CH10-LS 2-Snap

CH20-LS 2-Snap

CH30-LS 2-Snap

**Adhesive Cardholders** are envelope style and affix quickly and easily to the container. All have a clear window with solid back.

CH10 Adhesive

CH14 Adhesive

CH16 Adhesive

CH73-NFV2 Adhesive

**Label Placard** is a permanent label holder that allows for easy application and removal of single-use labels with no sticky residue or messy overlapping, keeping containers neat and clean.

## Cardholders

Cardholder	Outside Dimensions L x H (in)	Insertion	Style
CH10/CH10LS (ESD Safe)	7.75 x 4.25	Side	2-Snap, Adhesive
