

Short Slide Coupling Size 1-7

To provide additional axial movement a short slide coupling can be assembled using slide sleeves with standard hubs reversed. A center plate is provided as well. The plate is equipped with lube holes so both halves of the coupling will be adequately lubricated.

The center plate part numbers are listed below. See page 196 for the standard hub and fastener set part numbers.

Medium Slide Coupling Size 1-7

For even greater axial movement a medium slide coupling can be assembled using slide sleeves and center plates as above. Medium slide hubs are used to provide a longer slide length.

The medium slide hub part numbers are listed at the left. See above for slide sleeve and stop plate part numbers and page 196 for standard fastener set part numbers.
