

HKK Transmission Series Double-Pitch roller chain is similar to HKK standard roller chain except the pitch is twice that of standard roller chain. These chains weight less and are lower in cost than standard roller chain of the same strength. They are ideal for conveying applications with slow or moderate speeds, particularly when shaft centers are relatively long.

HKK's precision conveyor chains are technologically advanced for high strength and low elongation. HKK Superior Capacity Plus® cold-forged solid rollers and solid bushings, is of the highest quality conveyor chains available. Meets or exceeds ANSI standard B29.1.

HKK A2050 Specifications

HKK Chain Number	Pitch	Roller		Pin	Plate		Overall Width		Average Ultimate Strength (Lbs)	Average Weight Per Foot (Lbs)
		Dia.	Width		Height	Thickness				
	A	B	W	D	H	T	L1	L2		
HKK A2050	1-1/4	.400	3/8	.200	.571	.080	.400	.407	7,200	.49

FEATURES

- Superior Capacity Plus®
- Cold-Forged Solid Bushings & Rollers
- Special alloy pins
- All parts shot peened
- Many other engineered advantages

Available In

Stainless Steel
Aqua-Series II
