Neck Guides

www.SystemPlastSmartGuide.com

Application: Neck guides provide efficient product flow for PET containers in high speed air conveying applications. Multiple styles are available and are selected depending on the shape of the bottle neck.

Material: Nolu-SX has a material blend offering self lubricating properties like Nolu-SR plus an additive that reduces thermal expansion up to 40% compared to a standard UHMW product. This makes it ideal for 100 and 250 feet long coils as it helps prevent buckling and gaps on the conveyor line.
