

WEAR YOUR SHOES. PROTECT THEM WITH TINGLEY.

Over-the-Shoe Footwear Guide

Tingley overshoes are the perfect solution to protect you and your footwear from harsh environments and chemicals.

5 REASONS TO LOVE TINGLEYS

1 EASY TO CLEAN

Completely washable. No lining. Wipes dry quickly.

These are so convenient. You just slip them over your shoes and then rinse them off with the hose before you take them off.

- Medford, OR

2 DURABLE

More material in heel, toe, and cleats for longer wear.

Really comfortable, long lasting, tough enough to handle everything I get into on the farm.

- East Taunton, MA

3 LIGHTWEIGHT

Less material in the upper boot means improved flexibility and less leg fatigue.

4 EASY ON & OFF

Full opening gusset on boot styles allow for easy on. Heavy duty heel for easy kick off.

I have been wearing your 10" overshoes for probably over 40 years and still find them to be the best.

- Connecticut

5 EXCELLENT TRACTION

Deep-cleated outsole spits out debris to provide better grip.

Kept me dry and had excellent traction over multiple types of surfaces.

- James B.

MATERIALS

Natural Rubber

- Excellent stretch
- Doesn't crack or stiffen at low temperatures
- Superior slip, puncture and cut resistance
- Resists acids, alkalis, alcohols and dilute solutions of most chemicals

PVC with Frigiflex®

- Contains special additives for high stretch and flexibility in cold temperatures
- Chemical Resistance: fats, oils, acids, alkalis, hydrocarbons, alcohols and dilute solutions of most chemicals
