## **Features and Benefits**

# **HUBBELL ON-the-GO CHARGING**

Convenient Charging Stations

## **Powered Seating Boxes**

Hubbell's On-the-Go Powered Seating Boxes fulfill customers' need for power accessibility. As the use of electronic devices has increased, the demand for charging has followed. Powered Seating Boxes provide an easy means of charging user's devices while meeting custom space requirements. Seating boxes can easily be attached to waiting area seating arrangements, conference tables, lecture halls, anywhere convenient power is needed.

# Housing DesignRugged design features satin aluminum

- construction body with impact-resistant polycarbonate end caps
- Make any furniture or seating area into a convenient charging station
- Available with up to 4 boxes per unit

## Powered Seating Boxes

 Parallel module wiring keeping individual seating boxes from losing power up and downstream

 Push to reset circuit breaker—trip electronically and reset manually

#### **Charging Power**

- Fast charging speeds delivering up to 5 amps of charging power
- Green power LED provides visual indication of power to the devices

## Installation

- Security Torx-screw minimizes the potential for customers to open or tamper with units
- Hardwired permanently connected power and interconnecting cords
- Available with heavy-gauge durable powder coated steel mounting bracket

## USB ports

- Smooth insertion tamper-resistant devices provide an extra level of safety to your customers
- Overcurrent protection 12 amp string and 5 amp individual module protection

#### Configurations

- Powered seating boxes are available in convenient bracketed configurations that easily attach to any flat surface
- Unbracketed configurations are also available

SP15USB1

## **Features and Benefits**

# HUBBELL ON-the-GO CHARGING

## **Cabled Charging Stations**

Hubbell's On-the-Go Cabled Charging Stations require minimal assembly and install easily. There are two styles available; a semi-permanent wallmount unit or a relocatable floor stand.

The standard configuration includes (3) Apple<sup>®</sup> Lightning, (3) Micro USB and (2) USB Type-C cords, allowing for 8 devices to be charging at once. Each unit features an 18 inch wide by 1 inch deep device tray to accommodate a wide range of wireless devices.

Cabled Charging Stations can be ordered with the standard design (as shown below), blank, or with a custom logo or graphic. Custom artwork will be applied and shipped from the factory. Cabled Charging Stations

## Housing Design

- Eight charging connectors provide flexibility to charge a variety of smart devices
- The 18 inch tray holds multiple devices at once

## **Power Stands**

• Blank charging stations available

### **Charging Power**

- Charge up to 8 devices simultaneously without slowing charging speeds, up to 2.4A per port
   Efficient charging tasks of a substance of the second second
- Efficient charging technology with automatic authentication of nearly all mobile devices

#### Installation

- Each unit includes a 6 foot cord with a 15A 125V plug
- Ships as kit making for easy installation and assembly
- Floor stand unit is 4 feet tall and weighs approximately 30 pounds

## Wall Mount

• Wall mount unit includes mounting bracket and hardware

## **Custom Branding**

- Custom branding/graphics available
- Designed for indoor use

## **Features and Benefits**

# **HUBBELL ON-the-GO CHARGING**

## **Power Charging Pedestals**

Hubbell's On-the-Go Power Charging pedestals ships ready to install with four 20A 125V tamperresistant USB Type A and Type C combination duplex receptacles, with a ¾ inch NPT hub in the base and 36 inch long wire leads the assembly will accommodate all installations when fed from the floor below. The pedestal can also be mounted and wired over one of Hubbell's flush round floor boxes or single gang rectangular floor boxes.

Our 2 inch by 8 inch wing-shaped aluminum extrusion has a sturdy ¼ inch thick aluminum base plate with four pre-drilled counter sunk holes for mounting. Because of its shallow design, the pedestals can be mounted between most back-to-back transportation seating arrangements. Power Charging Pedestals

(Front View)

(Side View)

## Housing Design

Durable powder coated aluminum extrusion offers a permanent solution for high traffic areas
Ships ready to install

## Power Stands

• Back to back 39.79 inch and 34.29 inch receptacle heights will clear backs of transportation seating chairs

#### **Charging Power**

- Duplex receptacles include Hubbell's patented tamper-resistant technology allowing the plug to slide in effortlessly
- Combination Type A and Type-C USB configuration meets most charging needs

#### Installation

- Integral ¾ inch conduit hub in base
- Single circuit pre-wired assembly with 36 inch long #12 AWG wire leads
- Sleek 2 inch by 8 inch powder coated aluminum extrusion design at 52.40 inches tall

### USB Ports

 Heavy-duty stainless steel USB ports are rated for 10,000 cord insertions and removals

#### Custom Branding

- Custom branding/graphics available for light kit
- Available with energy efficient LED light kit to add visibility
- Indoor use only

## **Features and Benefits**

## USB Charging Receptacles Type-C • Type A&C • Type A

Hubbell USB Chargers are available in the new Type-C port, a combination unit with Type A & C, and the legacy Type A, all with more power. The increase in power to a 5 Amp 5 Volt USB port adds capacity so that there is always ample current to support multiple device charging. Portable mobile manufacturers are using the faster Type-C ports. More phones, tablets and other electronic devices are expected to use this new standard.

## Features

- Compliant with USB BC1.2 battery charging and 3.0 power delivery. Compatible with USB 2.0, 3.0 and 3.1 devices
- USB Type-C port is legacy USB Type A compatible (adapter cord not included)
- Heavy duty stainless steel USB ports; rated for 10,000 cord insertions and removals
- Patented Hubbell Tamper-Resistant technology uses cam action shutters
- Designed for commercial, industrial and home use

## The file formats below may not be sufficient for production ready artwork.

- 5 **PSD (Adobe Photoshop):** If built and saved the correct way can usually be used to prepare and produce production ready artwork.
- 6 PNG (Portable Network Graphic): These files contain only foreground images and will have a blank or no background, making them easy to place on any color or type of background. These file types may be sufficient for production ready artwork if the file is HD resolution, i.e. 1920 x 1080 or better.

7 JPG: The least compatible file to use with design and therefore should be considered a "last resort." If supplying a logo pulled off the Internet or saved down from a larger layered file, it more than likely will not be sufficient to prepare and produce production ready artwork.

## Process for Custom ON-the-GO Charging.

- Email custom artwork to Hubbell Territory Manager\* with the following information:
   \* If you don't know your local Territory Manager call Hubbell Customer Service at (800) 288-6000.
  - A. Art must conform to one of the 7 formats
  - B. Type of unit; power charging pedestal, wall mount or floor stand
  - C. Quantity of order
  - D. Name or title for artwork
- 2. Proof will be generated based on product type and artwork submitted and emailed to customer for approval.
- 3. Upon Approval, submit signed approval form and PO to Hubbell TM for order processing.
