

DIAMOND GRIT HOLE SAWS

SPECIALTY | COMMERCIAL & RESIDENTIAL

DIAMONDGRIT™

Diamond Grit hole saws are designed for use on extremely hard or abrasive applications where excellent surface finish matters. Hard-to-cut materials are used in commercial construction, as well as residential home remodeling and new home construction, and contractors need products they can rely on that make projects faster and easier.

RELATED PRODUCTS

DIAMOND GRIT RECIPES

Specifically designed for commercial or residential cutting of porcelain/ceramics, brick/masonry, cast iron, glass block, architectural stone, composites, and laminate flooring.

CARBIDE GRIT RECIPES

Designed for cutting materials too thin, hard or abrasive for conventional carbide tipped or bi-metal blades. Applications such as hardened steel, formed glass, fiberglass, laminates and composites.

CARBIDE GRIT HOLE SAWS

For use on hard abrasive materials including cement, brick, cinder block, cast iron, paster with lath, unglazed ceramics, fiberglass, and composites.

FEATURES

Fast - Fast and easy cutting of abrasive materials

Accurate - Hollow core keeps saw centered for cut

Easy - Side slot allows for fast and easy removal of material

Smooth - Smooth and clean finish edges that need little to no rework

Durable - Industrial Diamond Grit brazed to hardened and tempered alloy body

APPLICATIONS

- ▼ Porcelain
- ▼ Ceramic tile
- ▼ Brick
- ▼ Cast Iron
- ▼ Glass block
- ▼ Architectural stone
- ▼ Marble
- ▼ Granite
- ▼ Laminate flooring
- ▼ Composites
