2.9 Inch Bi-Material Return Roller for Chain Return

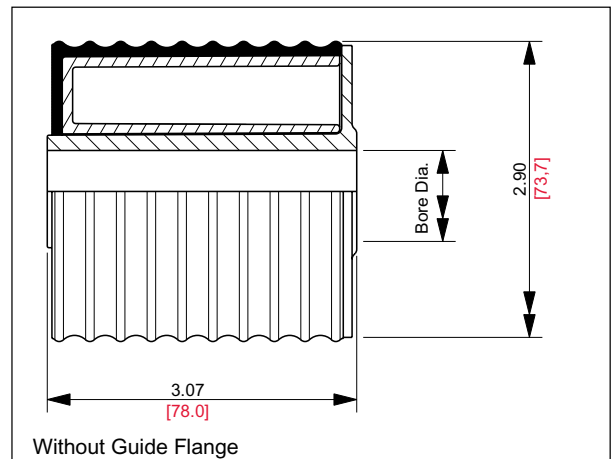

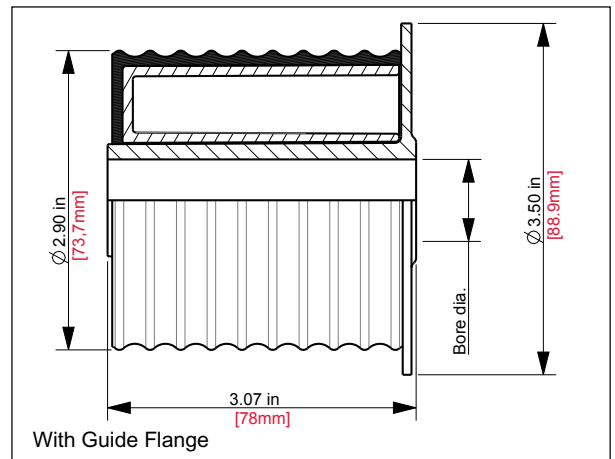

Rexnord®/Marbett® Bi-Material return rollers combine a high-friction, rubber outer surface with a low friction acetal hub to guarantee minimum wear of the chain and low noise in high speed applications. The rubber surface provides a high-friction interaction between the chain and the roller, which keeps the roller moving.

This minimizes wear to the top surface of the chain caused by non-turning rollers. The corrugated rubber surface of the roller is specifically designed to keep any lubricant where it belongs—on the chain. Each roller has a completely closed design, making it suitable for food applications.

Features and Benefits

- Available in 5/8 Inch or 3/4 inch bore sizes
- Corrugated surface ideal for lubricated and non-lubricated conditions
- Rubber surface for less noise even in high speed conveyor systems
- Acetal hub for low friction between the shaft and roller
- Completely closed design suitable for food applications
- 60 Shore rubber surface keeps rollers turning
- For chain speeds up to 500 FPM

Part Number	Flange	Bore Size		Hub Color
	Yes / No	in	mm	
906-656721	No	5/8	15.9	Tan
906-656731	No	3/4	19.1	Grey
906-656881	Yes	5/8	15.9	Tan
906-656891	Yes	3/4	19.1	Grey
