

Data information notice in accordance with Art. 3 para. 2 Regulation (EU) 2023/2854 ('Data Act') for connected products

[Productname(s)] { IMS-I } („Product“)

Connected products of Bosch Rexroth AG generate various data and information during their use. Below you will find information on the data available in the product, data access and your data rights.

1. Type, format and estimated volume of product data

The following data may be generated during operation and use of the product. The actual data generated varies depending on the specific use of the product.

(a) Types of product data

- See Appendix I
- Data stored in IMS-I is same as for IMSA-HF.

(b) Data format {& interface}

Data format: See in Appendix I.

Interface: Accessible via proprietary manufacturer interface.

(c) Estimated volume

Not relevant

(d) Currentness of data

Not relevant

Further details on the data generated in the product can be found [in Appendix I]

2. Storage location and storage duration

[Alternative 1]

The data is stored on the product

- and can be transferred:
If the product is returned to the manufacturer due to a defect, the manufacturer can access the information stored in the product to analyze the fault.

[Option 1.1]: The data is periodically overwritten/updated and is not deleted after a certain time.

{The product does not store personal product data}

3. Access modalities

Only the manufacturer can access the data via proprietary manufacturer interface.

4. Technical means and requirements for data access:

Not relevant

Appendix I

See Document R320103166 “Integrated Measuring System IMS for Ball and Roller Rail systems / Instructions for electrical interfaces”
