Thoro-Twist™ V-Belt

Specialty Belt

Thoro-Twist™ v-beltting is a perfect candidate for drives that have no take-up adjustment capability or for use as an emergency replacement belt.

Carlisle® Thoro-Twist™ v-belts outperform other link v-belts time after time in harsh environments. An incredibly strong, yet flexible belt with the same horsepower ratings as classical section v-belts.

Easy installation. Thoro-Twist v-belts can be made to required length, by hand, in seconds and rolled onto the drive just like a bicycle chain.

Thoro-Twist v-belts have the same cross section dimensions as regular belts and can be installed on existing sheaves with no changes in setup.
