

## Air King Universal Couplings

**⚠ WARNING**

- The use of an Air King safety clip or wire type retainer is necessary to ensure Air King universal couplings will not become accidentally disconnected. This guarantees the fittings are properly connected because the safety pin will not go through the holes in mating flanges until couplings are locked in place. Only one Air King safety clip or wire type retainer is required for each Air King universal coupling.
- to provide protection against coupling breakage and related hazards, Dixon recommends the use of a whip hose, see page 792 for Whip Hose safety information

## Hose Ends

## Features:

- can be used with Air King ferrules
- supplied with safety clip
- pressure rating: **150 PSI** at ambient temperature (70°F)
- supplied with rubber washers, part # AWR4
- meets pressure requirements as specified in A-A-59553 commercial item description superseding Mil Spec. WWC-633D
